

LEIReg update information

Registration – what’s new

LEIReg registration will with immediate effect take place in two steps:

1. Basic registration: Only your e-mail address and password will be required here.
2. Extended registration: This will require additional information such as company and personal data. Extended registration will allow you to make LEI requests.

Note for already registered customers

No basic or extended registration will be required. You will still be able to log in with your existing login data.

“LEI-Service” – what’s new

Applying for or transferring LEIs

Applying for or transferring LEIs, either for yourself or on behalf of your customers, will now be quicker and easier. Under LEI-Service you may directly select on behalf of whom or what entity, i.e. for your own or a third party company/institution, for an investment asset pool or for a branch, you intend to place an LEI-order.

“My data” - what’s new

Order administration

You may now track the status of your current LEI orders under Order administration. You will at all times, up to order status “under review”, be able to change your LEI orders or use the new process step “Document generation/download and file upload” to directly upload requested documentation via the platform.

LEIs/Data administration

You may here administrate your LEIs clear and convenient with options allowing you to, for instance, create requests for LEI renewals or notify us of changes to your data.

Address and contact data administration

The new address and contact data administration system will save you time when requesting several LEIs. Select your company address, contact data or billing data and store the information you enter to avoid entering the same data several times. Future LEI orders will now be faster to process. You may store required data and store defaults of your choice under a tag you define (e.g. “Meier GmbH billing data”).

LEI renewals - what's new

We introduce an automatic renewal function in LEIReg to guarantee consistent validity of your LEIs. This will allow us to automatically generate orders for the renewal of your LEI when expiry of its annual validity becomes imminent and that we will contact you should processing of the extension order require additional information.

For detailed information about this service, please see Point 3.3 "Annual revalidation" in our updated GTC.

Any questions?

We have a special interest in supporting and assisting you with any questions you may have. You are therefore welcome to contact our free Service number 0800 1234335 or e-mail us at service@bundesanzeiger.de.
